ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1991

Engineering Manpower Commission
of the American Association
of Engineering Societies, Inc.

Commissioners of the Engineering Manpower Commission, March 10, 1992

Mr Peter S. Adams, Consultant
E. I. duPont de Nemours & Co., Inc.

Dr Eleanor Baum, Dean, School of Engineering
Cooper Union

• Dr Fred Beaufait, Dean, College of Engineering
Wayne State University

Mr John F. Betsch, Aircraft Systems Division
Grumman Corporation

Dr Theodore A. Bickart, Dean of Engineering
Michigan State University

• Dr William R. Boyle, Vice President/Division Chairman
Oak Ridge Associated Universities

Mr Donald C. Brown, Consultant
(Retired, Sun Company/Oryx)

Mr Kenneth R. Dede, Manager, Personnel Relations/Research
Eastman Kodak Company

• Mr Edward J. Doyle, Consultant
(Retired, New Jersey Bell)

Ms Patricia Eng, Project Manager
Nuclear Regulatory Commission

Mr Irwin S. Ginsburg, Human Resources Consultant
Amoco Corporation

Mr Earl E. Gottsman, Vice President for Academic Affairs
Capitol College

• Mr Dwight Gourneau, Senior Engineer
IBM Corporation

• Mr Lewis G. Grimm, Principal Associate
Gorove/Slade Associates, Inc

Mr John Hannabach, Director, Corporate Relations/Placement
Georgia Institute of Technology

Mr David A. Kearney, Manager, Graduate Employment
Westinghouse Electric Corporation

Mr S. Joseph Kowalski, Consultant
Kowalski & Associates, Inc

Dr William K. LeBold, Director, Educational Research
Purdue University

• Mr Roger D. Madden, Chief Engineer
Omnicom, Inc

• Mr Daniel J. McGinley, Director of Curricula & Accreditation
American Society of Civil Engineers

• Ms Patricia Patterson, Manager, Mfg., Surveillance Systems Div.
Westinghouse Electric Corporation

Dr David R. Reyes-Guerra, Executive Director
Accreditation Board for Engineering & Technology

• Mr Michael B. Rubin, Program Manager
Nuclear Regulatory Commission

Mr Robert Rusek, Division Manager, Compensation
AT&T/Corporate

Dr William M. Sangster, Director of International Programs
Georgia Institute of Technology

• Mr Fred O. Schulz, Jr., Principal
ESOF Company

Mr H. Fred Shultz, Manager, Training & Employment
Exxon Research & Engineering

• Mr Glen J. Snyder, Consultant, SM/MS Inc.
(Retired, Babcock & Wilcox Company)

Mr John F. Spencer, Manager, Engineering Management Services
Port Authority of New York & New Jersey

• Mr James Donald Strong, Consultant
(Retired, U.S. Army/NSPE)

Mr James W. Sturtz, Director, College Relations Activity
General Motors Corporation

• Dr Anthony L. Tilmans, Consultant

Mr Stephen B. Tucker, Program Manager, Recruiting
General Electric Corporation

Dr John F. Van Domelen, President
Wentworth Institute of Technology

Dr Glen Vanden Berg, Agricultural Project Coordinator
Beltsville Agricultural Research Center, USDA

Dr M. Lucius Walker, Jr., Dean of Engineering
Howard University

Mr James E. Winget, Jr., Chief Production Engineer
Mobil Oil Corporation

Mr Alan D. Wolfson, Strategic Resources Director
IBM Corporation

• Represents AAES member society

Sustaining, Contributing and Academic Associates:

(Additional institutions are expected to be added to this list throughout the year.)

Patron Sustaining Associates
- General Electric Foundation
- National Action Council for Minorities in Engineering

Senior Sustaining Associates
- Amoco Foundation

Sustaining Associates
- AT&T
- The Boeing Company
- Chevron Corporation
- Eastman Kodak Company
- E. I. duPont de Nemours & Company
- Exxon
- General Motors Corporation
- Honeywell, Inc.
- IBM Corporation
- MCI Telecommunications
- Mobil Corporation
- Procter & Gamble Co.

FALL 1991

ENGINEERING MANPOWER COMMISSION
of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

© 1992 by the American Association of Engineering Societies, Inc. As it is the objective of AAES publications to be a forum for the free expression and interchange of ideas, the opinions, positions, and research stated in published works are those of the original researchers and authors and not by the fact of publication necessarily those of the American Association of Engineering Societies, Inc., or related bodies. Contributing researchers and authors are requested and expected to disclose any financial, economic, or professional interests or affiliations that may have influenced positions taken or advocated in these materials.

ISBN # 0-87615-227-2

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering--over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms.*

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

1992 Officers

Carleton A. Bayless, Chair, Board of Governors
Ernest L. Daman, Chair-Elect
Albert A. Grant, Past Chair
M. Jack Ohanian, Secretary/Treasurer
Mitchell H. Bradley, Executive Director

ENGINEERING MANPOWER COMMISSION

The Engineering Manpower Commission (EMC) has been a source of objective, timely data relating to the supply and demand for technological personnel since its organization in 1950. As an AAES Commission, EMC is composed of volunteers from professional engineering societies, academia, government, and industry, supported by a professional staff headed by AAES' Director of Manpower Studies.

EMC conducts annual surveys of industry and schools of engineering, monitors trends in the supply of and demand for engineers, and produces annual reports on engineering enrollments, degrees, and salaries. In addition to its statistical studies, EMC also produces the *Engineering Manpower Bulletin,* which assesses trends in the engineering workforce including participation in the profession by women and ethnic minorities.

1992 Officers

Donald C. Brown, Chair
Dr. Fred Beaufait, Vice Chair and Chair, Education Committee
Lewis G. Grimm, Vice Chair
Dr. Glen Vanden Berg, Chair, Enrollments Committee

AAES Staff

Director, Manpower Studies: R. A. Ellis
Director of Publications: Gordon Davis
Education Survey Manager: Diane Shinberg

The Engineering Manpower Commission wishes to express its grateful appreciation for the cooperation of the hundreds of organizations that provided the data on which this report is based.

TABLE OF CONTENTS

INTRODUCTION i

SUMMARY DATA vii

PART I: ENGINEERING ENROLLMENT, FALL 1991 1

ENGINEERING ENROLLMENT BY SCHOOL: ALL PROGRAMS COMBINED 3
- All Students 5
- Women 11
- African Americans 17
- Hispanic Americans 23
- Native Americans 29
- Asian Americans 35
- Foreign Nationals 41

ENGINEERING ENROLLMENT BY CURRICULA AND SCHOOL, FOR ALL STUDENTS 47
ENGINEERING ENROLLMENT BY DISCIPLINE AND SCHOOL, FOR ALL STUDENTS 87
- First-Year Full-Time Undergraduates 89
- Second-Year Full-Time Undergraduates 95
- Third-Year Full-Time Undergraduates 101
- Fourth-Year Full-Time Undergraduates 107
- Fifth-Year Full-Time Undergraduates 113
- All Full-Time Undergraduates 119
- All Part-Time Undergraduates 125
- Full-Time Master's Candidates 131
- Full-Time Doctorate Candidates 136
- All Full-Time Graduate Candidates 141
- All Part-Time Graduate Candidates 146

ENGINEERING ENROLLMENT BY CURRICULA, ALL STUDENTS AND SCHOOLS 151

PART II: TECHNOLOGY ENROLLMENT, FALL 1991 163

TECHNOLOGY ENROLLMENT BY SCHOOL: ALL PROGRAMS COMBINED 165
- All Students 167
- Women 173
- African Americans 179
- Hispanic Americans 185
- Native Americans 191
- Asian Americans 197

TECHNOLOGY ENROLLMENT BY CURRICULA AND SCHOOL, FOR ALL STUDENTS 203
TECHNOLOGY ENROLLMENT BY DISCIPLINE AND SCHOOL, FOR ALL STUDENTS 227
- First-Year Full-Time Associate Candidates 229
- Second-Year Full-Time Associate Candidates 233
- Other Years Full-Time Associate Candidates 237
- All Full-Time Associate Candidates 241
- All Part-Time Associate Candidates 245
- First-Year Full-Time Bachelor's Candidates 249
- Second-Year Full-Time Bachelor's Candidates 253
- Third-Year Full-Time Bachelor's Candidates 257
- Fourth-Year Full-Time Bachelor's Candidates 261
- All Full-Time Bachelor's Candidates 265
- Full-Time Post Baccalaureate Students 269
- All Part-Time Bachelor's Candidates 273

TECHNOLOGY ENROLLMENT BY CURRICULA, ALL STUDENTS AND SCHOOLS 277

APPENDIX: Illustrative Data Collection Form 287

INTRODUCTION

This is the 24th annual report from the Engineering Manpower Commission (EMC) on enrollments in engineering and engineering technology in the United States. This annual project has been substantially revised for this year's survey. One major change is that our printed report, previously released in two separately bound parts, is now issued in a single volume.

All data are for enrollment as of Fall, 1991. For the first time, the printed report includes convenient information on enrollment for particular discipline groups at specific institutions (such as civil engineering, electrical engineering technology, etc.) as well as differing enrollment levels (first-year full-time undergraduate, part-time graduate, etc.). Subtotals for each State are included. The report also identifies the numbers of women, members of minority groups, and foreign students at each school.

In engineering, the study covers 336 institutions, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET). Some of these schools have newly initiated engineering programs, and have not been included in previous enrollment reports from EMC. This report provides a comprehensive enumeration of engineering programs available in the United States today.

In engineering technology, the 1991 enrollment survey includes data from 302 schools. All schools with any ABET-approved technology curricula are covered, as well as a number of others. No coverage is provided of enrollment at the certificate level or of pre-engineering students in two- or three-year transfer programs operated by schools with no other engineering programs.

This single volume report combines materials previously issued under separate covers and consists of two parts: (I) engineering and (II) engineering technology. Enrollment for all students and for women, African Americans, Hispanic Americans, Native Americans, and Asian Americans is provided in both parts; foreign national enrollment is provided for engineering only.

In Part I, engineering enrollment is tabulated by the year in school—first year, second year, etc.—for full-time undergraduates, and by the type of degree sought—master's or professional engineering, and doctorate—for full-time graduate students. In Part II, technology enrollment is tabulated similarly by year in school, and data are also provided for post-baccalaureate students. Part-time students are tabulated separately at each level, irrespective of their year in school. Note that schools showing no data for particular full-time students may still have such students attending part-time.

Enrollment data are subject to many influences that may not be obvious to all readers. For example, first-year engineering enrollment is understated because not all entering students can declare majors; many students may need more than one year after reaching fourth-year status to complete their degrees; and schools offering both associate and bachelor's degrees in engineering technology do not follow uniform practices in classifying their students. Information on these and other quirks is included in footnotes to the tables in the *Summary Data* section that follows this introduction.

Four basic types of tabulations are provided, in addition to summary tables. The first is EMC's traditional summary of overall enrollment, across all curricula, for each school covered in this report. Schools are listed alphabetically within states; state subtotals and grand totals are included. These data provide basic institutional and geographic measures of participation in engineering and technology programs.

The second general type of tabulation provides detailed enrollment data for the major engineering or technology programs offered by these schools. Programs are listed within some twenty broad engineering disciplines (e.g., chemical, civil, etc.); disciplinary subtotals are provided both within these listings and in the separate summary tables. Within each broad discipline, programs are listed alphabetically by their detailed titles, within schools and states, thus preserving such distinctions as the differences between programs in general civil engineering, surveying engineering, and transportation engineering, in Part I, or civil technology and surveying technology in Part II. Note that we have dropped the practice of repeating these tables for each of the special population groups tracked by EMC.

The third and fourth sets of tabulations in Parts I and II are new. The third set provides separate tables for each enrollment level—first year full-time, second year full-time, all part-time, etc. Enrollment is tabulated by broad curricula groups (aerospace, civil, electrical, etc.). Data is organized by institution, in alphabetical order by state. The format is similar to that used in EMC's degree reports.

The fourth set of tabulations provides national enrollment for each individual program title, by broad discipline groups. This is the first time this tabulation has been provided for enrollment data; it is a complete listing of engineering programs in the United States (see pp. 151-161).

Like all of EMC's surveys of engineering enrollments and degrees since 1986, all tabulations in this report draw on a master data base on engineering and technology programs, in order to provide accurate, consistent descriptive data. EMC's educational surveys also use the data base to generate the survey forms used to obtain these statistics. Participating institutions receive laser-generated questionnaires that include the specific programs and other descriptive data applicable to a particular school. This simplifies data entry for all parties and improves the consistency and accuracy of the work.

Major efforts are made in these studies to obtain full cooperation from participating schools. In addition, when only partial responses are possible—for example, some schools cannot report the numbers of women who are enrolled in each specific combination of engineering program and year in school, but can report how many women are enrolled in each program, overall—then the overall data are pro-rated to generate reasonable approximations for data entry. As a result of these steps, the incidence of missing information in EMC's educational surveys has been greatly reduced. Consequently, these studies no longer use the estimates of missing data that appeared in our reports on enrollments and degrees before 1986. In addition, detailed codes are employed to report the precise adjustments used to deal with every response (see the description of the "T-A-R" codes, below).

Our 1991 enrollment survey is also available in the form of machine-readable files on IBM-format 5¼ or 3½ inch floppy disks configured for use with Lotus Development Corporation's 1-2-3 spreadsheet software. These files include complete data on the distribution of students in each population tracked by EMC among all of the engineering and technology disciplines reported by EMC. They also include detailed data on the sex of ethnic minority (and, for engineering, foreign national) students at each school. These data files are a powerful and convenient way to use personal computers to manipulate the Fall, 1991, enrollment survey results, generating new tabulations that are not provided by EMC in its printed reports. A similar product is available for EMC's survey of engineering and technology degrees.

Any questions regarding the course content or other details of specific engineering or engineering technology programs should be directed to the participating schools. Other inquiries about EMC's educational surveys are welcome. Contact R. A. Ellis, Director of Manpower Studies, American Association of Engineering Societies (see the inside back cover for address information). For ordering information and prices for either printed reports or machine-readable data disks, also see the inside back cover.

EMC'S NEW ERROR CHECKING SYSTEM

Like our recent report on 1991 degrees, the 1991 enrollment survey utilized a new data entry system which enhances control over every point of production. This system automatically performs checks on the validity of data as it is entered. The new software insures against both duplicate and missing program entries. Individual lines of program data are examined to insure that details for women, and for minorities and foreign nationals, do not exceed totals. The new system has identified some recurring problems in data submitted by schools over a number of years, (for example, some schools have regularly over-counted the numbers of ethnic minority or foreign national students). Problems that are due to errors in data entry are easily rectified; other anomalies require contact with each school to determine correct data. While entered data is awaiting corrections, it is flagged and stored in a separate provisional database, to be retrieved once corrected data is received.

As it is entered, each line of data is compared against similar information submitted to EMC the previous year. Thus, we now automatically track large fluctuations in the enrollment statistics for the individual programs for which we have previous data. If the updated school information, accreditation, or curricula group assignments are not recognized by the system, the system calls for appropriate actions by the survey staff. Response codes, used for schools that submit incomplete data, have been automated as well, to provide more specific descriptions of missing coverage. The new system recognizes whether the selected response code is valid for the program to which it is assigned.

EMC's staff formerly kept elaborate paper logs to track school responses, address and contact information updates, phone calls, and data entry. All these tasks have been automated, allowing for tighter control over all levels of interaction with the schools.

The new data system has allowed EMC to produce the most thoroughly checked enrollment survey in its history. Checks that formerly were done by hand, or after data entry towards the end of the survey, are now automated and on-going. This year, the majority of our old-style database checks proved to be superfluous.

Overwhelmingly, the largest burden of enrollment survey production is now the need to contact the schools for data corrections, missing data, and lack of response. After exhausting all possible means of getting complete and correct information from the schools, EMC resorts to implementing response codes, reasonable estimates, and substituting previous data.

As in earlier enrollment surveys, responses from previous years were used when schools were unable to provide current data. No attempt was made to substitute data for technology programs that were not accredited by ABET. EMC had traditionally limited substitutions to the previous year only; in 1987 this rule was modified to permit older substitutions of data where available, rather than lose a school altogether or rely on less valid forms of estimation. In 1991, 96 percent of the engineering schools contacted by EMC for enrollment data were able to meet our very demanding deadline. A complete accounting of the substituted cases follows.

NEW SCHOOLS AND NAME CHANGES IN 1991

Nine institutions are listed in engineering enrollment tables for the first time: Cogswell College in California, the University of California at Santa Cruz, Trinity College in Connecticut, the University of West Florida in Pensacola, Dordt College in Iowa, Ferris State University in Michigan, Grand Valley State University in Michigan, Saginaw Valley State University in University Center, Michigan, and Oklahoma Christian University. Newly listed schools with ABET-accredited engineering technology programs are Augusta Technical Institute in Georgia, Burlington County College in New Jersey, Albuquerque Technical-Vocational Institute in New Mexico, New Mexico Highlands University, Northwest Technical College in Ohio, and Virginia State University.

A number of name changes were reported. Southeastern Massachusetts University became the University of Massachusetts at Dartmouth; Savannah Area Vocational-Technical School became Savannah Technical Institute; Weber State College became Weber State University; Kansas College of Technology became Kansas State University at Salina; the College of Saint Thomas became the University of Saint Thomas; the State University of New York A&T College in Alfred is now listed as the State University of New York College of Technology in Alfred; Tri-Cities State Technical College in Tennessee became Northeast State Technical Community College.

Purdue University at Fort Wayne has requested that EMC recognize its joint affiliation with Indiana University. We did not change its listing, however, because the Indianapolis campus, which has a similar affiliation, did not desire a change in their listing. We feel that such an exception for one campus may lead to confusion among some of our readers, especially when comparing current enrollment listings to those of past years.

At the request of the institution, enrollment previously reported for the Space Institute at University of Tennessee are now reported with enrollment at the University of Tennessee at Knoxville. Note: since 1988, EMC mistakenly has received and used duplicate reports for Bachelor enrollment in engineering technology for the University of Nebraska's Lincoln and Omaha campuses. All these enrollments are now included in the reports from the Omaha campus, eliminating this duplication.

In counting institutions, EMC abides by local preferences in deciding whether or not to count a school's branches as separate entities. Thus all of the various locations of the Pennsylvania State University are counted as a single institution, while in other cases (for example, Purdue and the University of Texas), some branches are treated as separate schools.

MISSING AND SUBSTITUTED DATA

In a some cases, the Fall 1991 enrollment reports were not received by EMC. However, 1990 reports were available, and were substituted for the missing data. When these schools appear in tabulations, they are flagged with a special response code "0." In several cases older reports from 1989 and 1988 were substituted, and the code becomes "9" or "8." The substituted schools are:

Engineering Schools: substituted responses for eleven institutions:

Bridgeport Engineering Institute (Connecticut)
University of Bridgeport (Connecticut) (1988 data)
Florida A&M University/College of Engineering at Florida State University (FAMU/FSU)
University of Southwestern Louisiana (1989 data)
University of Detroit (Michigan)
University of Nevada at Las Vegas
Monmouth College (New Jersey) (1989 data)
United States Military Academy (New York)
University of Rhode Island (1989 data)
University of Tennessee at Chattanooga
Texas Technical University

Engineering Technology Schools: responses for thirteen schools with ABET-approved curricula were substituted:

Florida A&M University
Hudson County Community College (New Jersey) (1989 data)
San Juan College (New Mexico)
New York City Technical College (1989 data)
Technical Career Institute (New York)
Cincinnati Technical College (Ohio)
Hocking Technical College (Ohio) (1989 data)
Kent State University at Tuscarawas (Ohio)
University of Toledo Community & Technical College (Ohio) (1989 data)
Horry-Georgetown Technical College (South Carolina)
South Carolina State College
Texas Technical University
Utah Valley Community College (1989 data)

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

The enrollment survey uses a three- (in limited cases, four-) position alphabetical coding system to denote school types, institutional-level accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School:

"S" means state or other public control, including municipally-sponsored schools, but excluding the federal service academies.

"F" denotes the federally-sponsored schools.

"N" means non-sectarian, non-profit private institutions.

"R" denotes religiously affiliated private institutions.

"P" denotes proprietary schools.

"C" denotes combined public and private sponsorship, e.g. Cornell University.

A: School Accreditation:

School-level ABET accreditation codes were updated for this report. See below for program-level accreditation information.

"B" means that the school has ABET-approved courses in both engineering and technology.

"E" means at least one engineering program is accredited by ABET.

"R" means the school does not have ABET-accredited courses but is approved at the institutional level by regional accreditation agencies like the Southern Association of Colleges and Schools.

"T" means that at least one technology program is accredited by ABET.

R. Response:

These codes appear only when applicable; they are not necessarily identical to the similar codes used in earlier enrollment reports. Codes are listed here in alphabetical order. Users should note that these codes are more specific and extensive than in past reports, because response codes have been automated, and that some response codes have two digits.

"A" means that all details (women, minorities, and foreign nationals enrolled in engineering programs) are missing from the response. There may be such students at the school but they will not show up in the tabulations for the specific population groups. The numbers for all enrolled students are not affected.

"AE" means that due to anomalies in the data, EMC opted to use only program totals.

"B" means that details were provided for women only; details for minorities and for foreign nationals were not provided.

"BE" means that due to anomalies in the data, EMC opted to use only program totals and figures on women.

"C" means that details were provided for women and minorities only; details for foreign nationals were not provided.

"CP" means that data on foreign nationals have been prorated by EMC.

"D" means that no details on minorities or foreign nationals were provided.

"E" means that details were provided for women and foreign nationals; details for the minority groups were missing.

"F" means that details were provided for all of the minority/population groups except Asian Americans and foreign nationals; that is, Asian American and foreign national data were missing.

"G" means that no details were provided for Asian Americans.

"H" means that part-time enrollment was not separated from full-time enrollment.

"I" means that details for part-time students are included in full-time details.

"J" means that details for part-time students were not available.

"JE" means that no details were provided for part-time students and that all minority details were missing.

"K" means that details for African Americans, Hispanic Americans, Asian Americans and foreign nationals were unavailable.

"KE" means that details for Asian Americans and Native Americans were not separated from details on Hispanic Americans.

"L" means that all details for part-time students were missing, and no data was provided for foreign nationals.

"M" means that no data was provided for part-time students and foreign nationals.

"P" means that some data were developed by EMC, by pro-rating accurate aggregates (such as information on all women students) among the various programs at a school.

"Q" means that, based on past years' data, EMC designated two Native Americans as first-year students. This code applies to technology programs at Embry Riddle Aeronautical University in Florida.

"R" means that part-time students were not included in the data.

"S" means that no details for first year African Americans, Hispanic Americans, Asian Americans and foreign nationals were provided.

"T" means that all students were listed as part-time.

"U" means that all students were listed as part-time and no details on minorities were provided.

"V" means that all students were listed as part-time and no details were provided.

"Y" means that students reported as fifth year are cooperative students.

"0" denotes a substituted response using data originally submitted for Fall, 1990. Seven engineering schools and eight technology schools were treated with such data.

"9" denotes a substituted response using data originally submitted for Fall, 1989. Three engineering schools and five technology schools were treated with such data. Users should note that EMC did not collect separate gender data until 1990.

"8" denotes a substituted response using data originally submitted for Fall, 1988. One engineering institution was handled with this older data. Users should note that EMC did not collect separate gender data until 1990.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RR0: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1990 response. "TAR" code of NEG: this is a private, non-sectarian school with ABET-accredited engineering programs and missing details for Asian Americans.

Program-Level Accreditation Codes:

Program-level ABET accreditation codes were updated for this study. Note that EMC's program-level accreditation codes reflect only ABET certifications, and do not allow for program-level approvals from the new accreditation board for computer and information science. These are used only in the tabulations for specific curricula:

> "A" denotes ABET accreditation at the associate degree level.
>
> "B" denotes ABET accreditation for the program at the bachelor's level.
>
> "M" denotes ABET accreditation at the master's level (now only rarely used for programs with no B.S. equivalent).
>
> "N" denotes programs with no ABET accreditation. In general, where program titles match across degree levels, higher-level offerings will be flagged with the corresponding lower-level code if such an ABET certification exists. However, many situations exist where this rule cannot be unambiguously applied. For example, we have generally labeled master's level programs in engineering mechanics as "N" for "no ABET accreditation" even when an ABET-approved BS curriculum in mechanical engineering is offered. If an undergraduate program in engineering mechanics existed, then a "B" code would have been used for any corresponding higher-level program. In general, ABET does not attempt to accredit graduate programs, and codes at this level (other than the rare "M" designations) are meant only to denote the existence in an institution of an ABET-approved undergraduate course with an identical designation.

Discipline Category Abbreviations:

ACN = Air Conditioning/Heating/Refrigeration (technology only)
AER = Aerospace and related
AGR = Agricultural (engineering only)
ARC = Architectural
AUT = Automotive (technology only)
BIO = Bioengineering (engineering only)
CER = Ceramics (engineering only)
CHE = Chemical
CVL = Civil and Construction (engineering); Civil only (technology)
CON = Construction (technology only)
CMP = Computer
ELC = Electrical/Electronic (engineering); Electrical only (technology)
ELM = Electromechanical (technology only)
ELX = Electronic (technology only)
ENS = Engineering Science
ENV = Environmental (engineering only)
GNL = General Engineering
IMM = Industrial/Manufacturing/Engineering Management; in some tabulations these programs are broken out as follows:

    IEM = Engineering Management (engineering only)
    IMF = Manufacturing
    IND = All Other Industrial

MAR = Marine
MTL = Materials/Metallurgical (engineering); Materials only (technology)
MEC = Mechanical
MGN = Mining/Mineral/Geological (engineering); Mining/Metallurgical/Welding (technology)
NUC = Nuclear
PET = Petroleum/Natural Gas (engineering only)
PRE = Pre-engineering (undergraduate engineering only)
SYS = Systems (engineering only)
OTH = Others (including Agricultural, Biomedical, Environmental and Petroleum Technology)

MISCELLANEOUS NOTES

First-year enrollments are incompletely covered in these surveys, for a variety of reasons, including the fact that at many schools first-year students cannot declare a major field. The under-enumeration is consistent from one year to the next, so EMC's first-year time series data are reliable as an indicator of trends, even though they fall considerably short of a total enumeration.

In 1987, EMC stopped its partial coverage of enrollment in pre-engineering or other two-year transfer programs in community or junior colleges; it also dropped coverage of "3-2" transfer programs in four-year colleges that not do have their own engineering degrees.

Women reported include minorities and foreign nationals. Ethnic minorities are limited to U.S. citizens or other permanent residents. "Foreign Nationals" are students in the United States on F-1 (student) or J-1 (exchange) visas, and exclude immigrants or other permanent residents. This year EMC requested, at the degree level but not at the program level, the number of ethnic minority and foreign national students by sex. Most institutions provided this information; others had difficulty providing data at this level of detail. The results at the national level are reported in the *Summary Data* section following this introduction. As noted above, the detailed results are included on our machine-readable floppy disks. For ordering information, see the inside back cover.

SUMMARY DATA

Like EMC's most recent degree survey, the study of Fall, 1991 engineering and technology enrollments incorporates many changes and improvements, including the introduction of elaborate automated quality control systems; a shift to a single-volume format for printed reports; inclusion of completely new kinds of printed tabulations that allow users of these reports to easily determine enrollments in specific engineering disciplines; and the consolidation of summary materials that were previously scattered throughout the report into a single summary data section, providing a comprehensive picture of current outcomes and long-term trends in the enrollment of college students in engineering and engineering technology.

CONTENTS OF THE SUMMARY DATA SECTION

Six summary tables are provided. Following comments on each of them, we provide a brief assessment of engineering and technology enrollment trends as they appear as this is written, near the end of the first quarter of 1992.

All the tabulations in this section include footnotes that provide additional information on the nature and limitations of these statistics. In particular, the notes explain why the numbers of reported third-year and fourth-year undergraduates rise in these surveys, instead of remaining constant or even declining. The reader is referred to these notes for further details.

Table 1: All Engineering Students, Fall 1991, by Detailed Discipline Groups, Population Categories, and Enrollment Levels. A similar tabulation was included at the end of other recent EMC enrollment reports. The data provide a concise summation of participation in undergraduate and graduate engineering programs as of the Fall of 1991, for 23 engineering disciplines plus a 24th category for pre-engineering students, including the number of students who are women, members of four minority groups, and foreign nationals. These breakdowns include details for enrollment in engineering management and manufacturing engineering as well as other kinds of degrees traditionally classified by EMC under the broad heading of "industrial engineering." Owing to limitations of space, those details of industrial engineering programs are not included in the school-by-school tables provided in this report. However, the more detailed industrial engineering categories are used in the program-level tabulations provided for all students, and they are available on a school-by-school basis for specific population groups in the much more flexible format provided by EMC's machine-readable data files.

Table 2: All Engineering Students, Fall 1991, by Population Categories, Gender, and Enrollment Levels. A similar tabulation appeared in the introduction to the 1990 engineering enrollment report, which was the first EMC enrollment survey to report on combinations of gender and population group (such as Hispanic women). The table provides a national gender breakdown for nine levels of undergraduate and graduate enrollment, plus two subtotals for full-time students, for all students and for each of the ethnic and nationality populations tracked by the Commission. The table also provides a complete accounting for cases where the gender of the students was unknown (because some schools were unable to provide these details).

Table 3: Fall Engineering Enrollments, 1981-1991. A similar table has appeared in the introduction to previous EMC enrollment reports. This time series table provides a concise summary of trends in engineering enrollments during the last ten years.

Tables 4-6: these tabulations provide statistics for engineering technology degrees that are comparable to the data on engineering awards described for Tables 1-3 above. The time series tabulation (Table 6) is limited to five years, because stable longitudinal statistics from EMC's surveys of engineering technology only been available since 1987. (In 1986, the Commission moved to achieve 100 percent coverage of all ABET-accredited technology schools, and certain critical improvements were adopted in 1987 in our handling of disciplinary assignments; Table 6 is now feasible because of those changes five years ago.)

CURRENT TRENDS

As in the past, extended commentary on trends in engineering enrollment will be provided in EMC's *Engineering Manpower Bulletin* issue number 117 (March, 1992), "Engineering Enrollment Highlights, Fall 1991." However, the broad picture can be summarized as follows:

Overall undergraduate enrollments in engineering continued to hold up in the Fall of 1991, even increasing slightly. The same result was observed in 1990. This can be attributed to a pause in the long downward demographic trend in the number of high school graduates in the U.S., which led to a momentary increase in first-year engineering enrollments in 1988 (see Table 3). Since then, however, the numbers of first-year students in engineering reported to EMC have resumed their decline. If only demographic forces influence enrollment trends, then the decline in the number of first-year engineering students should level off during the next few years, and the numbers of new engineering degree candidates should begin to climb again during the second half of the decade. However, if poor economic conditions lead substantial numbers of young people to abandon thoughts of an engineering career, as has happened in the past, then instead of ending, the downward trend could accelerate.

Within this broad trend, the participation of women and minorities in engineering has continued to increase, on a proportionate basis for first-year women (who accounted for more than 18 percent of the new students) and for African American students, and on both a proportionate and an absolute basis for all underrepresented minorities, for both first-year and for all full-time undergraduate students. As usual, the gains are not large but they are evidence of movement in the right direction.

Among the major disciplines, undergraduate participation in aerospace and electrical engineering declined, both for first-year and total full-time enrollments. However, some other fields showed healthy increases, notably chemical engineering.

Data for graduate enrollments in engineering also maintain the general trends for other recent years. The numbers of graduate students increased at all levels. There was a slight rise in the foreign national share of full-time enrollment for master's degrees, an almost invisible decline in the share these students have of Ph.D. enrollment, and a somewhat more solid increase in the foreign national share of part-time graduate enrollments. The women's share of graduate engineering enrollments continued to grow; for the first time, there were more than ten thousand women enrolled full-time for advanced engineering degrees in the United States.

Enrollment trends in engineering technology programs are more difficult to assess than in engineering, owing both to shifting definitions in the profession itself, and to changes in EMC's approach to coverage of these curricula. The most reliable, consistent measure we have is based on time series data from 1987 to the present for participation in programs approved by the Accreditation Board for Engineering and Technology (ABET). These statistics indicate that overall technology enrollments increased slightly in the Fall of 1991 (see Table 6).

TABLE CONTINUES ON THE FOLLOWING PAGE...

* Note: population groups are neither exhaustive nor mutually exclusive, and will not sum to totals. In particular, women are also counted in both the ethnic and foreign national categories; see Table 2, dealing with combinations of gender and population groups, for details on this overlap. Foreign nationals are NOT counted in ethnic groups, which are for U.S. citizens and permanent residents.

---

* Note: some schools where first year students cannot declare major fields estimate the number of first year students who will enter engineering programs; others make no estimates and do not report any first-year enrollments to EMC. Other students included in this group are enrolled in formal pre-engineering or "freshman engineering" programs. The Commission does not track "pre-engineering" or "engineering science" transfer programs at two- or four-year schools with no engineering programs of their own. Transfers of such students into traditional engineering programs cause enrollments to rise for the third- and fourth-year levels.

* Notes: data for "All Students" are identical to those statistics in Table 1 and are reproduced here for the convenience of the reader. A few schools are unable to provide any sort of gender breakdowns for their students, which is why the sum of men and women for the "All Students" categories falls short of the count of total enrollment. A larger number of schools can provide overall breakdowns by gender but cannot furnish detailed data for every combination of gender and population category--which is why the numbers for "Gender Unknown" are larger, in total, for the population groups than they are for the data on all enrolled students. Population groups are neither exhaustive nor mutually exclusive, and will not sum to totals.

NUMBER OF SCHOOLS											
Total, All Schools	286	286	292	289	297	311	316	320	323	328	336
Schools With At Least One ABET-Approved Program*	250	249	258	258	264	270	277	281	284	289	303

* Note: some institutions are accredited separately by ABET but report jointly to EMC; in other cases, ABET may allow accreditation actions to include satellite campuses that report individually to EMC. Counts of the number of institutions may also be influenced by decisions at the local level as to the organization and autonomy of units in state higher education systems; for example, the University of Tennessee's Space Institute, which has sometimes reported separately to EMC in the past, is now covered by data submitted by the parent campus at Knoxville. For such reasons, ABET and EMC counts of the number of engineering institutions will not be identical. EMC's coverage of U.S. engineering institutions is comprehensive, including all schools approved by ABET as well as others, with the following exceptions. First, newly initiated programs may not become immediate participants in the Commission's annual surveys. Second, the studies do not cover a few institutions affiliated with teaching hospitals that offer graduate programs in biomedical engineering but no other form of engineering curricula. Third, as noted elsewhere, EMC does not track enrollment in pre-engineering transfer programs offered by a large number of two-year and four-year colleges with no other form of engineering education. Flows of students into engineering from these programs are very substantial, as is shown by the increases in enrollment at the third-year and fourth-year levels in EMC's own data. However, coverage of these programs would require substantial increases in the number of institutions reached by the annual surveys. Fourth, data on first-year enrollments are also understated because at many schools entering students cannot not declare majors. Readers should also be aware that students may take more than four years to finish an engineering curriculum; often they may have completed enough credits to be classed as fourth-year students, but will need more than one more year of study to finish requirements for their degree. Accordingly, fourth-year enrollment statistics in this survey include some students who will graduate in 1993 as well as those scheduled to get degrees in 1992. Fifth-year students are those formally enrolled in five-year programs; in the past, some schools have also used this category to report special students or other non-degree candidates. Data on non-degree enrollment are removed from the survey by EMC staff when they can be identified as such, as this study is intended to track only degree candidates. In the future it may be possible to add separate reporting categories for special students, graduate engineers who are not pursuing a degree but who wish to obtain additional training, and so on.

TABLE CONTINUES ON THE FOLLOWING PAGE...

* Notes: population groups are neither exhaustive nor mutually exclusive, and will not sum to totals. Women are included in ethnic categories; see Table 5 for details on this overlap. Note that EMC does not track foreign national enrollments in engineering technology programs. Users of these tables should be aware that schools offering technology programs at both associate and bachelor's degree levels do not follow uniform conventions for enrollment classifications; some institutions treat all first- and second-year students as associate degree candidates, and report no bachelor's degree candidates for those levels, while others separate these students into associate and B.S. groups.

TABLE CONTINUES ON THE FOLLOWING PAGE...

---

* Notes: the only technology programs classed by EMC as "engineering science" are those analogous to similar specialties in engineering (for example, optical engineering technology). The term "engineering science" is sometimes used to denote two-year pre-engineering transfer programs, but these are not tracked in EMC's surveys. Enrollment for two types of industrial engineering technology curricula--manufacturing technology and all other industrial engineering tech programs--are combined into a single industrial engineering technology group in some of the tables provided elsewhere in this report.

	Asian Americans	299	157	6	462	496	23	26	26	82	157	43	4

* Notes: data for "All Students" are identical to these statistics in Table 4, and are reproduced here for the convenience of the reader. A few schools are unable to provide any sort of gender breakdowns for their students, which is why the sum of men and women for the "All Students" categories falls short of the count of total enrollment. A larger number of schools can provide overall breakdowns by gender but cannot furnish detailed data for every combination of gender and population category--which is why the numbers for "Gender Unknown" may be larger, in total, for the population groups than they are for the data on all enrolled students. Population groups are neither exhaustive nor mutually exclusive, and will not sum to totals.

* Notes: ABET does not accredit post-baccalaureate programs (there are rare exceptions for programs leading directly to the Master's as a first professional degree). Post-baccalaurate enrollments reported in Part II of this table result from the Commission's practice of referencing the ABET status of corresponding undergraduate curricula where a school has both undergraduate and graduate programs with identical titles. Some institutions are accredited separately by ABET but report jointly to EMC; in other cases, ABET accreditation actions include satellite campuses that report individually to EMC. Due to these differences, ABET and EMC counts of the number of engineering technology institutions will not be identical. The Commission's coverage of engineering technology institutions includes all schools approved by ABET as well as a limited number of others. Complete coverage of ABET-accredited technology schools began in 1987; the time series for ABET-approved programs beginning in that year is EMC's most trustworthy indicator of trends in engineering technology. The Commission does not attempt to provide comprehensive coverage of all schools that offer technology curricula; this would require that we add hundreds of institutions with small programs to the annual surveys. In general we believe the survey coverage is good, especially for programs leading to bachelor of technology degrees. Data for the State of Florida, where EMC is often able to obtain statistics for all community colleges in the state by working through the offices of the Florida Department of Education in Tallahassee, provide an example of the kind of information that these surveys may not pick up elsewhere. In general, definitions and other conventions that influence data collection are less clear-cut for engineering technology than for engineering itself. For example, one of the ABET-approved Florida schools, St. Petersburg Jr. College, prefers to report directly to EMC even if the Tallahassee office has provided data for the school, because it favors a more stringent definition of what constitutes an "engineering technology program." In short, enrollment (and degree) data on engineering technology are more subject to uncertainty than are corresponding statistics for engineering, especially in time series.

ENGINEERING MANPOWER COMMISSION
SURVEY OF FALL 1991 ENROLLMENT IN ENGINEERING AND ENGINEERING TECHNOLOGY

American Association of Engineering Societies 1111 19th Street NW Suite 608 Washington, DC 20036-3690 (202) 296-2237

U Wisconsin-Madison **DEADLINE: NOVEMBER 15, 1991** **Page 1 of 1**

Bachelors Enrollment in Engineering

If necessary, correct and/or update mailing label and these data:

Mailing Label

John G. Bollinger
Dean of Engineering
U Wisconsin-Madison
1513 University Avenue
Madison, Wisconsin 53706-

School Type S Public (State or Municipal)
School accreditation for engineering E ABET Engineering
Dean of Engineering (or equivalent):
Name John G. Bollinger
Phone (608) 262-3481
Person to contact concerning data on this form
Name Richard Jenkee
Title Educational Services Asst
Phone (608) 262-3783

REVISED INSTRUCTIONS — PLEASE READ BEFORE COMPLETING FORM

This is EMC's survey of all engineering and engineering technology enrollments for Fall 1991. All engineering programs at your school should be reported, including any programs outside the school of engineering. The dean of engineering or equivalent should review all the data, resolve any questions as to the inclusion of particular programs, and make estimates, if necessary, to fill in all incomplete items of information.

1 Check the mailing label and school information above. Make changes as necessary. Be sure to check Dean and contact person information.

2 Check that correct forms for your school have been provided. (Separate forms are provided for each level of program (associate, bachelor, graduate, etc.) and for engineering and technology.) Do NOT report students on inappropriate forms. If additional or different forms are needed, call us at (202) 296-2237.

3 For each line of pre-printed data, review degree titles, ABET status, and program group, in the second and third columns from the left. (ABET status reflects those in effect for the 1991-92 academic year. See codes and abbreviations below.) Correct any errors. Cross out titles which no longer apply. Enter new titles on blank lines. Note the use of new broad program groups: IMF (Manufacturing), IMN (Management), and IND (Industrial). These program groups were formerly grouped together as INM (Industrial, Manufacturing and Engineering Management).

4 For each program, enter the **TOTAL** number of students, based on year and full/part-time status, in the first set of columns.

5 In the next set of columns, enter the number of **WOMEN** students by year and full/part-time status (these figures should include all women, regardless of race, ethnicity, or citizenship).

6 Skip to the last set of columns on the right and enter the number of **FOREIGN NATIONAL** students—people in the U.S. on student (F-1) or exchange (J-1) visas—by year and full/part-time status.

7 Finally, in the remaining sets of columns, enter the numbers of **ethnic minority students who are also citizens or permanent residents (including foreign-born students on immigrant visas) of the U.S.** by year and full/part-time status. (Here, we are interested in four seperate groups of peoples: African Americans/Blacks; Hispanic Americans/Latinos; Asian Americans, including Americans of Pacific, South Asian, and Middle Eastern origin; and Native Americans/American Indians, including Eskimos and Aleuts. Both men and women ethnic minorities should be counted in these groups. NO ONE should be counted in more than one ethnic minority group, and NO ONE should be counted as both an American ethnic minority and a foreign national.)

8 After entering data by program for all students, women, ethnic minorities and foreign nationals, enter **TOTALS** for each column across the bottom of the chart. Remember to enter **THREE LINES OF TOTALS** (for men, for women and for all students), including totals for ethnic minorities and foreign nationals by sex.

9 If there are no students in a particular category, enter zero. **ITEMS LEFT BLANK WILL BE ASSUMED TO BE UNKNOWN UNLESS YOU INDICATE OTHERWISE. A** correctly completed form should have NO blank items, because items for which firm data is not available should be estimated by the deans or their appointed representatives.

The data on women, minorities, and foreign nationals are vital. We find that virtually all institutions do possess these statistics, although often they are maintained in such places as offices of minority affairs, institutional research, etc. If, however, you are unable to provide any of the requested data, please make some indication on each form.

10 **REVIEW ALL ENTRIES. DOUBLE CHECK YOUR MATH!**

If you have ANY problems, call Diane Shinberg or Dick Ellis for help at (202) 296-2237. We must have your completed response by November 15, 1991. A business reply envelope is provided for your convenience.

We are obtaining nearly 100 percent cooperation from all U.S. engineering institutions and all technology schools with ABET-approved programs; we seek participation from other schools with engineering technology programs, as well. The data you provide is the authoritative source on the production of engineers in the United States, and is used by agencies of government, corporations, journalists, and researchers. Thanks for your help.

CODES AND ABBREVIATIONS

ABET STATUS: a program-level accreditation code. "A" denotes ABET accreditation for associate-level offerings, "B," for bachelor-level programs, "M" (rarely used) for masters-level programs. "N" stands for programs not approved by ABET. Codes reflect statuses for the 1991-92 academic year. Graduate programs may be tagged with these codes if a school happens to have an ABET-approved program at the undergraduate level with an identical title.

PROGRAM GROUP: broad disciplinary categories associated with each specific program. The classification used in past years, INM (Industrial, Manufacturing and Engineering Management), has been separated into three groups: IMF, IMN, and IND (see below).

Engineering Program Codes:

AER (Aerospace)
AGR (Agricultural)
ARC (Architectural)
BIO (Biomedical)
CER (Ceramic)
CHE (Chemical)
CVL (Civil & Construction)
CMP (Computer)
ELC (Electrical & Electronic)
ENS (Engineering Science)
ENV (Environmental)
GNL (General Engineering)
IMF (Manufacturing)
IMN (Engineering Management)
IND (Industrial)
MAR (Marine & Naval Architecture)
MTL (Materials & Metallurgy)
MEC (Mechanical)
MGN (Mining, Mineral, Geosciences)
NUC (Nuclear)
PET (Petroleum & Natural Gas)
SYS (Systems)
OTH (Others)

Engineering Technology Program Codes:

ACN (Air Conditioning, Heating, Refrigeration)
AER (Aeronautical)
ARC (Architectural)
AUT (Automotive)
CHE (Chemical)
CVL (Civil, Highway, Surveying)
CMP (Computer)
CON (Construction)
DRF (Drafting & Design)
ELC (Electrical)
ELM (Electromechanical)
ELX (Electronic)
ENS (Engineering Science—used only for programs like Optical Technology
as EMC does NOT cover Pre-Engineering or equivalent curricula)
GNL (General Engineering Technology)
IMF (Manufacturing)
IND (Industrial)
MAR (Marine)
MTL (Materials)
MEC (Mechanical)
MGN (Mining, Metallurgical, Welding)
NUC (Nuclear)
OTH (Others, including Agricultural, Biomedical, Environmental and Petroleum Technology programs)

CURRENT ENGINEERING MANPOWER COMMISSION PUBLICATIONS

Custom runs of degree, enrollment or salary data are possible; call us for details. Our machine-readable products are provided on IBM-standard 5¼" or 3½" floppy disks and include most, not but all, of the details available in EMC's printed reports; in the case of the enrollment disks, data is also provided that is not included in the printed materials. For more information, contact the AAES Manpower Studies Department.

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1992 (available July, 1992)

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.
member price: $169.00 non-member price: $287.50

PROFESSIONAL INCOME OF ENGINEERS 1992 (available July, 1992)

An abridged version of the Special Industry Report. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.
member price: $70.00 non-member price: $115.00

SALARIES OF ENGINEERS IN EDUCATION 1992 (available July, 1992)

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.
member price: $70.00 non-member price: $112.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1991 (published April, 1992)

An overview of the enrollment of students in engineering and engineering technology programs throughout the nation. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.
member price: $120.00 non-member price: $195.00
Machine-readable data files for Lotus 1-2-3: member price: $595.00 non-member price: $795.00

ENGINEERING AND TECHNOLOGY DEGREES, 1991 (published December, 1991)

A comprehensive report on recent engineering and engineering technology degrees that provides general statistics for schools and states on degrees in 40 engineering and technology disciplines, data for awards to women, minorities, and foreign nationals, and detailed data for specific curricula.
member price: $140.00 non-member price: $230.00
Machine-readable data files for Lotus 1-2-3: member price: $595.00 non-member price: $795.00

ENGINEERING MANPOWER BULLETINS (eight issues throughout the calendar year)

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.
Full subscription year: member price: $69.00 non-member price: $117.00
Single copies: member price: $9.00 non-member price: $14.00

NOTE: Back issues of the *Engineering Manpower Bulletin* and most of EMC's printed reports are available.

TO ORDER:

Member prices are available to members of AAES member societies, employees of Industry Affiliates, and educational institutions or firms that have participated in the study to be purchased. Special prices are available to employees of EMC Sustaining Associates and their subsidiaries, and employees of EMC Academic Associates. Please include society affiliation and membership number, Industry Affiliate, EMC Sustaining Associate, EMC Academic Associate, or survey participant information with your order, if applicable. First class postage (U.S. domestic) is included in the purchase price. Foreign orders add 10%; check must be payable in U.S. funds. Institutional purchase orders are accepted, as are Visa and MasterCard charges (include account number, expiration date and signature). Orders charged to Visa and MasterCard accounts may be placed directly by phone (U.S. only) at 1-800-658-8897. Mail orders should be directed to the AAES Publications Department, Suite 608, 1111 19th St. N.W., Washington, D.C. 20036-3690.
